HIGH-END

# GLASS COATINGS

vetrolack

The Vetrolack range includes a wide selection of high-quality glass paints and, thanks to the simple and safe handling of the materials, ensures perfect results in countless areas of application.

The wide variety of colours is complemented by an exceptional finish. Numerous surface effects are available, such as etch, satin, high gloss, hammered, crack, rainbow/prism or terracotta effects.

For difficult substrates, the optional Vetrolack Adhesion Promoter is available and guarantees perfect adhesion.

# **Vetrolack CLASSIC** 2000

Vetrolack CLASSIC 2000 offers high scratch and impact resistance as well as high dishwasher resistance, both in production and for the end consumer.

The coating is dried by baking at 180°C.

The high cross-linking density allows pasteurisation of the filled food without any problems.

**Vetrolack CLASSIC** 2500
Vetrolack CLASSIC 2500 combines the advantages of Vetrolack CLASSIC 2000 with high energy savings.

The baking temperature for this system can be reduced to 130°C without compromising quality.

## **Vetrolack PRO** 5000

Specially designed for everyday use, Vetrolack PRO 5000 creates a surface with high scratch resistance.

Its excellent dishwasher resistance guarantees a long-lasting finish for tableware:

Industrial dishwasher: > 1000 wash cycles
Domestic dishwasher: > 500 wash cycles

**Vetrolack PRO** 5200
Drinking glasses coated with gold or silver lacquer are an eye-catcher on any table setting!

Glasses coated with Vetrolack PRO 5200 are dishwasher-safe (50 wash cycles in a domestic dishwasher).

## **Vetrolack REX** 7000

Fast handling during production thanks to physical drying and high scratch resistance during transport and everyday use are the distinguishing features of bottles coated with Vetrolack REX 7000.

G1 and L'Oreal tests confirm that the highest requirements for adhesion, softening, colour transfer and colour changes are met.
